About This Game

Untamed: Life of a Cougar takes wildlife simulation to the next level by mirroring closely the life of a Mountain Lion in the Wild. You have a large territory that features various environments, from grassy mountains to lush forests, and a wide selection of animals to kill and eat.

Players are required to find a mate (male Cougar) at the start of the game. After mating, the player will give birth to a litter of 3 cubs. The cubs start life at a very early stage and are unable to run or walk fast, this stage, like in real life, is the hardest part and it leaves both mother and cub vulnerable, any mistake can lead to the death of all the cubs.

As the cubs get older, they become more active and are able to run, but starvation and predators are still heavy threats.

Each character in Untamed: Life of a Cougar has a unique behavior, and the player will have to learn how to interact and adapt to these behaviors. Using the 'Cougar Vision', players will be able to detect prey or predator from a distance, while with a robust stealth system, players can stalk their prey before they make the lethal attack to secure their next meal. But the survival doesn't end there as sometimes, the player will have to defend his/her kill from scavengers.

The controls are easy to get used to, with support for key binding. Players have the ability to lock the Frame rate to either 60fps or 30fps, while a hint system and various tips ensure that the player is never lost on the gameplay.

Features:

- Various Cougar skin colours.
- Replayability
- Unique animal behaviour
- Seamless controls
- Day and Night cycle
- Fast paced combat

-
- Realistic simulation
 - Single player
 - Open world environment
 - Animal Character

Title: Untamed: Life Of A Cougar

I mean it's a really cool idea, and I did somewhat enjoy it, but there are a lot of bugs.

And like they are really "game breaking" bugs *in my opinion* - Just because raising my kittens to adulthood was my goal, and 2/3 of them got stuck in terrain. One in a rock and the other in a bed of water. :/

And it wasn't like I could pick them up to pull them out, I spent a while trying to save the one in the rock, but because they couldn't move, they starved to death. The kitten in the water, that was quitting time for me. :P

Honestly if you want to play a game where you play as a big cat and raise your kittens.. Go play Paws: A shelter 2 game. This game was a nice idea but not as good as Paws. I did however like the variety of animals (prey and enemy) in this game!. My review of Untamed: life of a cougar

pros

- My cubs are adorable
- it's not realistic but I'm going to pretend that's okay!
- cubs have different stages
- there is a tutorial
- You don't even have to have cubs in this game, I've played it like that.

Cons

- glitches
- Anything more than easy mode is a bit too extreme
- It like never updates I think this is as good as it will ever get

My experiences with this game:

~~me last year~~

I was roaming around and stuff. And found glitches. I also went into easy mode. And restarted the game multiple times. And had a hard time. Then, right when i was 9 days, almost at the 2nd stage, the stage i waited for, i was completely surrounded. And I had to restart the game. again. So, then i got another game and Oak died. (one of my cubs) then I finally got into the 2nd stage after a pretty chill time. But, right now, the male cougar is attacking me every 15 seconds. alongside several other creatures.

But..... When I'm not suffering its almost kind of fun. So, I recomend this game to anyone who strongly enjoys routines, has lots of patience, and prays to the cougar god every night because that is the only way you will enjoy this game, no jokes, no lies.

I'm giving this game

~2/10~ Because i don't pray to any cougar gods ever

and

~7/10~ because i strongly, wholeheartedly enjoy routines.

thank. this is a fun concept that was never fully realized. the game has not been updated since 2016 and the website for the game hasnt been updated since 2015.

with some polishing and content, this could have been a cool game.

i supported it because i like to see cool things done with video games. if i had known this is where they were going to stop, i wouldnt have done so.. The AI for the cubs is really annoying. They are constantly trying to wander away from the safe den and directly into danger. Plus the playing mechancis are really weird. Also, the graphics are dated. I mean, some of the symbols for eating and picking up the cubs make me think of pre N64 games. 2/10 would not recommend.. The game is interesting when you just read about it, but the graphics are beyond terrible, when you run it is actually slower than walking, and the music was

distorted terribly.

If someone were to remake this game properly, as in they made it look and sound realistic, they fixed up controls and movement, and actually spent some time on this, this could be a good game.. This is a FANTASTIC animal sim that is more thoughtful than I expected!

The entire life of a cougar, from finding a mate to the last days of motherhood, is expressed in this game and it is not shy of showing the HARSHNESS of being a mother cougar either! Enemies everywhere (*@#! those freaking eagles!!!), prey (both easy kills and hard fights), and other cougars make up the in game world where they all interact with not only you the player but also each other making it feel more alive!

I highly recommend it!

The recent addition of new enemies adds more fun to it and I hope the dev will continue to expand upon this great game!. If your the type of person that's into Proper animal simulation games. It's nothing like those crappy Ipad games you find that claim to be an animal simulation but is clearly not. untamed life a cougar is quite a realistic Cougar simulation. The graphics are good, and have improved alot since when it first came out. You play the role of a female cougar, which you get to pick out of quite a few colors. You start out in search of a mate. This is the only time that the males are Friendly to the female. Infact on my first try I sat and watched several males fight eachother over the right to mate with the female cougar. Once the strongest male won, I allowed him to do the 'Deed'. After falling pregnant, i started searching for a den to give birth in, catching prey and avoiding hunters along the way. When i found a place i liked, I give birth to 3 cubs. They were small and slow, but adorable. I left them at the den to search for food and to mark my territory to keep rival females at bay. We stayed there, until a male had learnt of our whereabouts. And so i had to lead my cubs to safety, otherwise that male would kill them. My cubs are now on the second stage of life. They are still spotted but are able to keep up with mum. The female you begin with isn't that strong or able to run for a longer period of time. That's where the stats come in. You can gain stats and use those stats to unlock abilities. Like Longer health, Stamina and even Quicker acceleration. I've also recently found out that the cubs have genetics from both of the parent's. So the parent's colors affect the cubs colors. Each animal reacts differently to your approach. A deer will flee, a Male deer, will also flee, but if attacked he will kick. A bison, Moose and Horse will warn you by either shaking their heads or scraping their hoof along the ground. If you get too close they attack, instead of other games where npc's automatically attack the second your in range. Predators though will attack you when in range. Specially wolves. Bears and foxes, i've caught them stalking my cubs. Eagles attack both mum and cubs. I've caught them swooping down on my cubs, i just manage to get there in time and the eagle hobbles along on the ground trying to take off. Not all of the human NPC's are alone.. That's right, some of them have backup.

Pro's

Realistic Animal behaviour. (For both Cougar's and npc's.)

Realistic Cougar and animal Sounds.

Quite Realistic Animations.

Different Life stages for cubs. I've only witnessed 2 so far. Barely walking stage (Maybe a week or 2. Has Spots), And Cub stage (Has Spots, and can keep up with mum.) But from the website, i've seen a slightly older cub with no spots.

Upgradable Cougar. (Stats)

Plenty of prey to hunt and dangers to face to keep you on your toes.

Game not easy, (Even on easy.) Prey is sometimes hard to Stalk and catch in normal mode. That's what Target mode is for (T)

Cubs play with eachother.

Day and Night cycle.

The Game World is beautifully detailed.

Con's

Foggy. It's too foggy so you can't always see where your going.

You can get swarmed by a lot of predators. I was attacking humans as i ended up bumping into them, since the fog made it hard to see a few feet in front of you. When i had Told my cubs to stay, and focused on the humans, a bear came out of nowhere, and attacked 1 of my cubs, then the dogs decided it would be fun to join in to. I had 1 cub left. So i had no choice to maul everyone who provoked my wrath and then reloaded my save.

No weather. (Though that's probably coming in later.)

Seasons. There's no seasons. It's always spring. I wonder what it'll be like in winter. How hard it would be to survive if prey numbers dropped.

Having to shift constantly between target mode to normal mode after each fight. As when attacking in normal mode it's hard to keep sight of your prey. If in Target mode it automatically locks on for you which makes it easier. But because i'm the type of person that likes there character to be fully zoomed in, i have to keep constantly scrolling after exiting out of target mode.

Though it's not a big deal as i'm getting used to it.

Killed prey despawns too quickly. At the newborn stage, i left the cubs at the den since they are far too slow to keep up with mum at that age. Well there was no food near home so i travelled for awhile. When i caught a deer, i dragged it back home only to get a few feet away from my den and have it poof. My poor cubs were starving by this time. Maybe have it where prey that have been killed have a longer time to despawn.

Things i'd hope the developer will consider is random litter numbers. Each time you always have 3 cubs. I think it would add a little suspense to the whole "oh i wonder how many cubs i'll have this time" kind of thing.

Other than those the game is fun to play. This game is to show you all the things a cougar must face to raise offspring and survive. And it pulls it off.

while i enjoyed this game, it is clearly not for everyone. the game takes a while to complete and you do a lot of the same thing (hunting, exploring, and escaping enemies), so if you get bored easily you might not enjoy it. there are still a few small glitches i have found, and i do recommend hitting the save button often.

i enjoyed the large map, the fact that the cubs look different depending on genetics, the variety of other animals and that you can level up. if you are a fan of games like shelter, shelter 2 or wolfquest then i recommend this completely!. I fell in love with the concept of being a cougar, but was sorely disappointed when everything on the map was a blob and there was no mouse sensitivity options to allow me to actually catch prey instead of spinning in circles. Not something I'd recommend.. i think this game needs some work. i really like the concept, being a cougar is fun and interesting and raising my cubs was challenging. but the ui was just awful. and turning up my resolution made it much worse. the graphics could be better, but overall not TOO bad. i can certainly live with it. the mini map is terrible and the game has some bugs. the AI is bad too. this really does have potential to be a great and fun game, but it just seems unfinished atm. despite all the negatives, i do enjoy playing it, but im not sure i can really recommend it to others.. Recommended only when on sale.

Love the call of screaming, ungrateful kittens who don't understand that mommy has places to go and animals to slaughter? Well well well, welcome to Untamed! The cougars here are seriously Untamed. Like, they have to be "untamed" 30 times just to get the whiny little cubs.

And what happens when those tiny, little, precious cubs are finally here? Time to hunt, of course! But not only do you get to hunt, you also get to run from a feral male cougar trying to kill your family! Yay!

Once you finally get away from the male there's a good chance you've lost a cub or two (honestly not the worst thing in the world, I chose favorites anyway.) And after that you better get to hunting. Soon your cubs will be in the next stage of life, and will actually be able to walk at an acceptable speed. Oh joy!

The male will return, you'll have to change dens again, and any sort of social life mommy cougar had before will fade away just as quickly as your cubs' health will.

In time the little bitc- I mean your precious angels will grow up and leave you behind. Hey look, you gave up your life to raise cubs for nothing! Woo! And after that what does mommy cougar do? Hunt, increase stats, try not to die a lot. Currently the only way to have more cubs is by starting over with a new character.

Summary: Overall the game is fun for a playthrough or two and occasional play after the cubs are gone, but I don't think it's worth the money unless on sale. It's not always the most realistic either; predators and prey spawn at every turn. Also you can't eat the hunters who try to kill you. Phooey.. So started out my game trying to avoid the amorous advances of a male mountain lion, wanted to explore the surrounding area. After a few adventures I stalked through a piece of heavy vegetation and found myself two metres away from a hunters big bad rifle, I swiftly pounced mauled the hunter senseless then threw him off a cliff. I scampered down after him to have nice tasty breakfast of Cletus but unfortunately it seems human meat is off the menu...I was then killed by his hunting dogs in brutal revenge attack! 10V10 would maul human hunter and be ripped apart by hunting dogs again!!

This game jumped out at me when it went on sale today due to my love of sandbox games and big cats. Very unusual and brave concept for a game and so far it really pulls it off. The developer obviously done their research on mountain lions as its very true to a BBC documentary I watched about them recently, mating, hunting, marking territory etc. The terrain is also authethetic and the map is quite large. Can't wait to see what the developer has in store for the future, playing as a male mountain lion might be interesting for example. Keep up the good work.. I fell in love with the concept of being a cougar, but was sorely disappointed when everything on the map was a blob and there was no mouse sensitivity options to allow me to actually catch prey instead of spinning in circles. Not something I'd recommend.
